

# Adjust Bracelet Size

## How to properly adjust bracelet size slightly

### STEP 1

Note the position of the hands: thumbs are just below the end caps. To make the bracelet slightly larger, very gently pull apart the ends.

### STEP 2

Conversely to make the bracelet slightly smaller, very gently push the end caps together.

That's all there is to it.

### CAUTION

The above adjustments are intended to be done only once or twice to get the perfect fit.

Please be very careful not to open the gap between the end caps too much or too often. Flexing the wire cuff too much or too often will lead to the wire breaking.

If you have any questions about determining your size, our Customer Care Specialists will be glad to assist you. Please call or email us today:
